

CENTER FOR DEVELOPING MINDS

# Early Learning Classes

**Weekday, 2-hour classes for ages 2-6.  
10-12 week sessions.**

**Lead Instructor:  
Cassie Korbfort, M.S.Ed.,  
Child Development Specialist**

CDM's Early Learning Classes provide targeted early intervention for pre-elementary school students across all domains: cognition, social-emotional, communication, adaptive behavior, and physical. All children are appropriately challenged based on their individual skills and needs. Children will learn through a combination of unstructured/structured play and small/large group activities. Each week will include a theme such as "pets" or "transportation" that children will explore while developing their skills.

Parents will receive weekly summaries of class activities and skills used along with pictures of their child throughout the week. Parents will also receive two thirty-minute parent-teacher conferences to discuss their child's progress, strategies, and next steps. Children are not required to be toilet trained.

The sessions will be held in our new Early Learning Clinic. Class fee is \$1000 per week (9 hours of class time), for 10-12 week sessions. Classes are carefully curated to benefit all participants and class size is limited to provide students with personalized attention. To learn more and schedule an intake appointment with our child development specialist for possible class placement, please contact the clinic at 408.358.1853.
