

Inclusive PlaySchool Classes

Tuesday through Thursday, 8:30-11:00 am, for ages 3-5.
Rolling admissions for each 16 week session.

Has your child been, or is likely to be, unsuccessful in a traditional daycare or preschool setting?

Interested in a specialized program that recognizes your child's strengths while supporting their struggles?

Playschool highlights:

- Completely individualized support from caring staff and custom curriculum designed for your child.
- Two progress meetings with parents.
- Small group size to ensure personalized attention. Classes have a maximum of 8 children, and a maximum student to clinician ratio of 3:1.
- Daily snack and assisting with feeding goals, if applicable.

Children will learn through a combination of unstructured and structured play, group activities, and personal support. Each week will include a theme such as "pets" or "transportation" that children will explore while developing their skills.

Our child development specialist will create an individualized intervention plan for each child with early academic, social-emotional, and behavior goals in collaboration with parents. Parents will receive summaries of class activities and skills used. Data will be taken to track progress and keep parents informed.

Children are not required to be toilet trained.

Cost: 2 days/week is \$375/week; 3 days/week is \$500/week.
Intake appointment required if new to our Clinic (\$150).
