

# CENTER FOR DEVELOPING MINDS

# Speaker Services

Center for Developing Minds clinicians are featured speakers at local and national events and conferences, and frequently lecture to parents and professionals on a wide range of behavioral and neurodevelopmental topics.

Our experienced clinicians can give interactive talks or more formal presentations. Each presentation is tailored to the audience, whether a small chat or large lecture. CDM clinicians can also provide a variety of live-stream video presentations to schools, teachers, or parent groups. CDM speakers offer expert advice and practical examples and tips to attendees. Examples of recent talks and possible subject areas include:

## **General Sessions for Parents**

“Preparing Kids to Launch.”

“How Young Brains Vary: Understanding your child.”

## **Educational Disabilities**

### **Autism**

“Solutions for Students on the Autistic Spectrum.”

### **ADHD**

“Everything You Need to Know about ADHD.”

## **Emotional Well-being**

### **Anxiety and Depression**

“Too many fears: How to help my anxious child.”

### **Anxiety and ADHD**

“Is it Anxiety or ADHD or Both?”

### **Temperament**

“Understanding Your Child’s Temperament.”

## **Child Behavior**

### **Oppositional Behavior**

“The Terrible 2’s, 3’s, 4’s, & 5’s: Parenting strategies for challenging behaviors.”

“Meltdowns to Shutdowns: Learning to cope with disappointments.”

### **Promoting Social Functioning Skills**

“Helping Your Child to Navigate Their Social Worlds.”

### **Managing Screen Time**

“Parenting in a Social Media World.”

### **Behavior Management**

“I Wish my Kid Came With an Instruction Book: Tips for parenting your young child.”

“Raising a Motivated Child: Strategies to help kids grow up to be curious, independent, and enthused learners.”

“Big Feelings! Big Emotions! Time for emotional regulation support.”

## **Neurodevelopmental Functioning**

### **Attention**

“The Attention Functions and Dysfunctions.”

### **Executive Functions**

“Raising an Organized Child.”

“Creating Cognitive Flexibility: How parents can encourage academic life through executive functioning.”

### **Memory**

“Something is Not Right: Subtle signs of learning disabilities.”

### **Social Cognition**
